SUMMARY

Software engineer with 4 years of experience building and maintaining enterprise Python and .NET applications, migrating on-premises systems to AWS, and automating database workflows. Curious, problem-solving technologist pursuing an MS in Computer Science at Northeastern University. Seeking co-op opportunities in software engineering, DevOps, or cloud operations.

EDUCATION

Northeastern University

2025 – 2027 (Expected)

Master of Science in Computer Science GPA: 3.67/4.0

Boston, MA

Related Courses: Algorithms, Programming Design Paradigms, Database Management Systems, Foundations of Artificial Intelligence

KLE Technological University

2017 – 2021

Bachelor of Engineering in Electronics and Communication Engineering

Hubballi, Karnataka

Related Courses: Digital Signal Processing, Microprocessors, Communication Systems, Computer Networks

TECHNICAL KNOWLEDGE

Languages: Python, SQL, C#, Java, JavaScript

Frameworks/Technologies: ASP.NET, Flask, React, HTML, CSS, NumPy, Pandas

Databases: MySQL, MongoDB, data modeling

Cloud: AWS (EC2, S3, IAM)

Tools: Git (version control), PyCharm, VS Code

WORK EXPERIENCE

Accenture Solutions Pvt. Ltd.

2021 – 2025

Packaged App Development Analyst

Bengaluru, Karnataka

- Maintained and enhanced 4 enterprise applications (2 .NET, 2 Python) serving 100+ internal users across 3–4 cross-functional teams, handling feature development, debugging, and production support.
- Led migration of on-premises applications to AWS infrastructure, collaborating with client-side architecture teams to redesign workflows and maintain technical documentation for seamless deployment with minimal downtime.
- Reduced support ticket inflow by 15–20% by authoring stored procedures and automating SQL database workflows, enabling end users to self-serve access and resolve common issues independently.
- Diagnosed a high-priority production incident by implementing Dynatrace monitoring on an AWS-hosted application used for internal invoice generation, identifying connection-level failures and restoring service reliability.
- Managed deployment of Android and iOS applications to client Play Store and App Store accounts; built client-facing SharePoint sites using Power Automate and TypeScript; implemented partial CI/CD automation using Firebase to streamline release workflows.

PROJECTS

PortFol.io – Stock Portfolio Tracker | Python, Flask, MySQL, SQL

2025

- Built a portfolio tracker for stock/ETF trades; designed a normalized MySQL schema and enforced CRUD via stored procedures, triggers, and scheduled P&L snapshots (no raw SQL in Flask).

Calendar Application | Java, Swing, Gradle, JUnit, TestNG, JaCoCo, PIT

2025

- Built a full-featured desktop calendar application in Java Swing following OOP principles and MVC software design, supporting event creation, editing, and scheduling similar to Google/Apple Calendar.
- Achieved high test coverage using JUnit and TestNG with JaCoCo reporting and PIT mutation testing; enforced code quality via Checkstyle.

INTERESTS / ACTIVITIES

- **Activities:** Organizing Committee Member – Pleiades College Fest; Core Member – Electronics Association; Volunteer – DaanUtsav community outreach, KLE Technological University (2018 – 2021)
- **Publication:** Load Balancing using OpenDaylight SDN Controller – International Research Journal on Advanced Science Hub, Vol. 2, Issue 9; Best Presentation award
